

Combinations

● 650 series combination

● 750 series combination

● 900 series combination

Filters and Mist Filters

● Options

- Non-ion specification
- Bowl specification:
Nylon bowls
- Drain cock specification:
Drain cock with fitting
Auto drain type drain cock

Modules

D module for bracket-combined use

R module

Regulators

RN650
RN651
RN652

RN900
RN902

● Options

Pressure gauge with built-in switch

Pressure gauge

Pressure gauge
for low pressure

Digital pressure
gauge with built-in
sensor

Embedded pressure
gauge

Modules

D module for bracket-
combined use

R module

Lubricators

LN650
LN651

LN900
LN901
LN902

● Options

- Non-ion specification
- Lubricator specification:
 - Micro lubricator
 - Machine lubricator
- Bowl specification:
 - Nylon bowls
- Drain cock specification:
 - Drain cock with fitting
 - Screw type drain cock

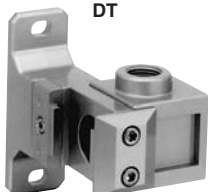

List of Equipment Combination

Body size		650 series						900 series

Handling Instructions and Precautions

F.R.L. Combinations

Installation location

1. Install in locations where the ambient temperature is between 5~60°C [41~140°F].
2. The product cannot be used when the media or the ambient atmosphere contains any of the substances listed below.
Organic solvents, phosphate ester type hydraulic oil, sulphur dioxide, chlorine gas, acids, or alkali, etc.
3. Avoid installation in locations subject to vibrations greater than 9.8m/s² [1G].

Mounting method

Mount in a vertical position, with the piping connections on the top and the bowl on the bottom.
(If using regulators as single units, any mounting direction is acceptable.)
Leave enough space underneath the bowl to allow easy access for draining collected liquid, and replacement of the filter element.

- Notes:
1. Do not perform any machining on the body of the unit before or during mounting work. Its functions could be damaged.
 2. Use air for the media.
 3. Do not allow operating pressure to exceed a maximum of 0.97MPa [141psi].
 4. If using in locations subject to dripping water, dripping oil, etc., or to large amounts of dust, use something to cover and protect the unit.

Air Filter and Lubricator

Drain cock

● Screw type

(Air filter Standard Order code: -A)
(Lubricator Order code: -D)

Rotating the drain knob to the left opens the drain port, and the collected liquid is expelled.

● With fitting

(Air filter Order code: -F1)
(Lubricator Order code: -F2)

Rotating the drain knob to the left opens the drain port, and the collected liquid is expelled.

Caution: The drain knob should be operated using fingertips.

● Auto drain type

(Air filter Order code: -A)

When a certain volume of collected liquid has accumulated, or when the pressure inside the bowl has fallen to less than 0.02MPa [3psi.], the collected liquid is automatically expelled. The collected liquid may also be expelled manually by turning the drain knob to the left.

1. In the auto drain, air is exhausted from the drain port until the supply pressure reaches 0.15MPa [22psi.]. This is normal, and even rotating the drain knob in this situation will not prevent the air from bleeding out.
(If the time required for the supply pressure to rise to 0.15MPa [22psi.] seems too long, consult us.)
2. The drain knob should be operated using fingertips.
3. If attaching a tube to the fitting, use a nylon tube with inner diameter of 6mm [0.236in.]. Do not let the tube bend in the area near the fitting connection.
4. The fitting can be rotated freely in any direction. As a result, the tube does not need to be removed even when manually draining the collected liquid.

When placing orders for replacement of pressure gauges, see the table below.

Model	Optional order code	Sold separately	Module sold separately
650 750	G1A	G1-40	—
	GS1A	GS1-50-DL	
	GS1B	GS1-50-AL	
	GS1C	GS1-50-DL-T	
900	GS1D	GS1-50-AL-T	8-90M (with bolt)
	G1A	G1-40	
	GS1A	GS1-50-DL	
	GS1B	GS1-50-AL	
	GS1C	GS1-50-DL-T	
	GS1D	GSS1-50-AL-T	

Remark: If switching between G1A and GS1□, module (8-90M) is not required.
